PROFILE

I am a Product-focused Web Developer who believes that great code and great design go hand-in-hand. From my background in Visual Design to web development, building applications with Next.js and Supabase, I focus on creating digital experiences that are as functional as they are intuitive. My experience in customer service has shaped my people-first approach to problem-solving and teamwork. My goal is to grow within a company that values personal development and contribute to its long-term success.

WORK EXPERIENCE

- Prodeff AB** Oct 2025 - Present
Web Developer Intern
 - Developing an Automated Candidate Matching System that parses requirements and ranks candidates using custom logic, including automated email notification workflows.
 - Built a centralized Admin Panel with Role-Based Access Control (RBAC) to manage multi-tenant data, users and security tags.
 - Designed and implemented a Tenant Support System and a real-time Meeting Room Booking System with an interactive calendar, directly improving operational efficiency.
 - Created a modern, dynamic Menu Management Platform for the restaurant industry, enabling real-time updates and customization.
 - Work closely with business stakeholders to translate functional requirements into maintainable and high-performance code.
- ThaiWISE Hela Människan i Malmö** April - May 2025
Web technician Intern
 - Redesigned and optimized the website using WordPress(Elementor Pro) with a primary focus on enhancing User Experience (UX) and visual identity.
 - Developed a digital platform that integrated custom database structures with high-quality visual assets designed in Canva, bridging technical functionality with design.
 - Collaborated cross-functionally with the ThaiWISE team to ensure all digital solutions aligned with organizational goals and vision.
